07/2016 - 06/2017

Product Manager assistant for a new solution in partnership with Legrand.

Help to manage the development of a solution composed of new in-wall smart switches & power outlets. They allow to remotely control lights, rolling shutters & home appliances from your smartphone or via voice control.

- Coordination of the works of several teams of different trades
- Work with the hardware development team (mechanics & electronics)
- Work with the embedded software development, backend & frontend teams
- Participate in the applications' development & design (iOS & Android)
- Assist the supply chain & industrialization team

08/2014 - 07/2015

Improving tooling for watch part stamping.

- Increase the life of stamping tools by optimizing heat treatments, trying new steels and coatings - increase up to 3 times lifetime and reduction in machining costs.
- Research new technologies to achieve cleaning, annealing and lubrication of stamped components
